Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore to the extent that the limitation is understood, "each segment of the guide rail and the flanges of the semi-cylindrical halves have a progressively variable section" as recited in claim 1, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "segments (11)" see claims 1-9. Note: Applicant is advised to correct the specification with respect to the claim changes.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure

Art Unit: 3654

number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 1-10 are objected to because of the following informalities:

In claim 1:

Line 1, "Demountable reel" should be --A demountable reel--;

Line 11, delete "adapted";

In claims 2-9:

Line 1, "Demountable reel" should be --The demountable reel--.

Appropriate corrections are required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 8-9, "the flanges (6) projected transversally inwards or outwards" is indefinite and vague. Examiner cannot determine whether the features stated above is inwards or outwards.

In claim 1, line 14, the phrase, "guide rail and/or the flanges...etc." is indefinite and vague. Examiner cannot determine whether the features stated above are inclusive together or exclusive in alternative form.

In claim 1, lines 15, the phrase, "a progressively variable section" is indefinite and vague. What constitutes "variable"?

Claim 1 recites the limitation "the rims" in line 7; "the segments" in line 13; "the walls" in line 18.

Claim 5 recites the limitation "the interior diameter" in line 3.

There are insufficient antecedent basis for these limitations in the claims.

Applicant is advised to check rest of the claims.

Because of the indefiniteness, claims 1-9 cannot be meaningfully treated with respect to the prior art at this time.

Conclusion

Art Unit: 3654
